### **Use of Non-GAAP financial measures**

The company uses a number of non-GAAP financial measures that management believes are useful to investors because they illustrate the performance of normal, ongoing operations, which is important in understanding and evaluating the company's financial condition and results of operations. They are not, however, a substitute for U.S. GAAP financial measures. Therefore, the company has provided reconciliations of the non-GAAP measures to the most directly comparable U.S. GAAP measure at the end of the release. The company adjusts U.S. GAAP measures for items not directly related to ongoing operations. However, it is possible these adjusting items have occurred in the past and could recur in future reporting periods. Management also uses non-GAAP measures for goal setting, as a basis for

determining employee and senior management awards and compensation, and evaluating performance on a basis comparable to that used by investors and securities analysts.

### \*U.S. GAAP (GAAP) net income attributable to PFG versus non-GAAP operating earnings

Management uses non-GAAP operating earnings, which is a financial measure that excludes the effect of net realized capital gains and losses, as adjusted, and other after-tax adjustments the company believes are not indicative of overall operating trends, for goal setting, as a basis for determining employee and senior management awards and compensation, and evaluating performance on a basis comparable to that used by investors and securities analysts. Note: it is possible these adjusting items have occurred in the past and could recur in future reporting periods. While these items may be significant components in understanding and assessing our consolidated financial performance, management believes the presentation of non-GAAP operating earnings enhances the understanding of results of operations by highlighting earnings attributable to the normal, ongoing operations of the company's businesses.
