“I’m proud of our accomplishments in 2020 and our ability to meet the year’s challenges head on,” said Dan Houston, chairman, president and chief executive officer of Principal. “Our diversified business model and strong financial position enabled us to focus on what matters most – the protection and well-being of our customers, employees, and communities. We finished the year strong with fourth quarter non-GAAP operating earnings of \$410 million and \$1.4 billion for full year 2020. We see momentum as we head into 2021 including the final migrations of our Institutional Retirement and Trust (IRT) customers to Principal, the resiliency and recovery of our small to medium-sized businesses, and the growing strength of our global asset management enterprise.”

¹ Use of non-GAAP financial measures is discussed in this release after segment results. Non-GAAP operating earnings for total company is after tax.

“We’re in one of the best financial positions in our company’s history. Our balance sheet and underlying investments are high quality and performed exceptionally well in 2020’s stressed and volatile markets. Our capital deployment strategy is balanced and disciplined, focused on creating long-term shareholder value. In 2020, we deployed over \$900 million of capital to common stock dividends and share repurchases. We restarted our share repurchase program in the fourth quarter with \$75 million of buybacks. I look forward to 2021 knowing we have the right business model and enterprise strategy in place to help Principal grow and support our customers around the world.”

Additional details on the impacts of COVID-19 can be found in our fourth quarter 2020 earnings call slide presentation and details of our U.S. investment portfolio are available in a supplemental slide presentation, both available at principal.com/investor.

⁷The company has provided reconciliations of the non-GAAP measures to the most directly comparable U.S. GAAP measures at the end of the release. The company has determined this measure is more representative of underlying operating revenues growth for PGI as it removes commissions and other expenses that are collected through fee revenue and passed through expenses with no impact to pre-tax operating earnings.

⁸ Pre-tax return on operating revenues less pass-through expenses = pre-tax operating earnings, adjusted for noncontrolling interest divided by operating revenues less pass-through expenses.

⁹ Combined net revenue (a non-GAAP financial measure): net revenue for all PI companies at 100% less pass-through commissions. The company has determined combined net revenue (at PFG share) is more representative of underlying net revenue growth for PI as it reflects our proportionate share of consolidated and equity method subsidiaries. In addition, using this net revenue metric provides a more meaningful representation of our profit margins.

Use of Non-GAAP financial measures

The company uses a number of non-GAAP financial measures that management believes are useful to investors because they illustrate the performance of normal, ongoing operations, which is important in understanding and evaluating the company's financial condition and results of operations. They are not, however, a substitute for U.S. GAAP financial measures. Therefore, the company has provided reconciliations of the non-GAAP measures to the most directly comparable U.S. GAAP measure at the end of the release. The company adjusts U.S. GAAP measures for items not directly related to ongoing operations. However, it is possible these adjusting items have occurred in the past and could recur in future reporting periods. Management also uses non-GAAP measures for goal setting, as a basis for determining employee and senior management awards and compensation and evaluating performance on a basis comparable to that used by investors and securities analysts.

*U.S. GAAP (GAAP) net income attributable to PFG versus non-GAAP operating earnings

Management uses non-GAAP operating earnings, which is a financial measure that excludes the effect of net realized capital gains and losses, as adjusted, and other after-tax adjustments the company believes are not indicative of overall operating trends, for goal setting, as a basis for determining employee and senior management awards and compensation, and evaluating performance on a basis comparable to that used by investors and securities analysts. Note: it is possible these adjusting items have occurred in the past and could recur in future reporting periods. While these items may be significant components in understanding and assessing our consolidated financial performance, management believes the presentation of non-GAAP operating earnings enhances the understanding of results of operations by highlighting earnings attributable to the normal, ongoing operations of the company's businesses.
